

WALL OF EXCELLENCE

This Wall of Excellence recognizes the achievement of RNs who have demonstrated their dedication to providing the best infusion care by attaining the Certified Registered Nurse Infusion (CRNI[®]) credential.

Offered by the Infusion Nurses Certification Corporation (INCC), the CRNI[®] credential is the only nationally recognized and accredited certification in infusion nursing.

The CRNI[®] credential serves as an objective measurement of nursing excellence, competency, and experience, with a goal of promoting optimal health outcomes.

The designation CRNI[®] documents and validates a nurse's experience in all nine core areas of the infusion nursing specialty and therefore demonstrates their dedication to providing the best possible infusion care to their patients.

Please join us in recognizing the accomplishments of the nurses from this organization who have earned the CRNI[®] certification.
